

Assisted Living to Meet Individual Needs

At Angel's Touch, we believe in providing the assisted living care that supports each person with individualized levels of service. This includes personal assistance with daily living activities such as bathing, dressing, personal hygiene and monitoring of medications.

We strive to see that each person is encouraged to eat a well-balanced diet and to be as active as possible. To best meet the needs of our residents, we meet with each person's personal physician and physical and occupational therapists as needed. Seniors experiencing memory disorders are provided services by specially-trained staff so that their particular needs are met.

We encourage residents and their families to be involved. We offer a team approach to providing care. You and your family are encouraged to be a strong part of that team.

Our Respite Care Program is excellent. As openings permit, we provide short-term care for seniors whose family members are away or during an illness when enhanced levels of assistance are needed.

At Angel's Touch, our goal is to provide much more than just custodial care. We strive to create a real life for our residents. Life is meaningless without social interaction, work and play. Traveling and outdoor activity are also critical for a quality life. Residents are encouraged to join in with household activities such as folding clothes, helping with meal preparation, and other meaningful activities. Having a sense of purpose and personal worth is a central concept in achieving happiness.

Our goal is to help seniors have a safe and meaningful life.

- Someone who needs help with eating, bathing, or the activities of daily living.
- Someone struggling with memory disorders.

Angel's Touch

Angel's Touch is a unique assisted living retirement community. As many of us understand, aging can be a very difficult process. Even the strongest and most exceptional people learn that aging can be a very humbling experience. Having seen relatives and friends struggle with this experience, we were motivated to open our home to seniors to help them better cope with the process of aging. Our goal is to make aging as pleasant as possible.

I am from Chinese and German lineage. My grandfather came to this country from China in 1910. In China, seniors are treated with great respect. My parents taught me that seniors are to be held in high regard because of their wisdom, knowledge, and experience. I have learned over the years that they were right. The old adage "with age comes wisdom" is true. Their experiences are invaluable. I learn something from them each day. I am inspired when I watch them enjoying each day in a family environment. While being with children and pets, our residents are encouraged to be as independent as possible. Most importantly, we all enjoy being around people who care about us.

As all of us have seen, nursing homes are not a solution for most seniors who need help with the activities of daily living. Seniors don't want to be in a huge facility with hundreds of other people. We don't live like that when we are young, so why should we live like that as we get older.

There is a better way. Come visit our home. The residents, the staff, and my family would like to meet you.
